

My wife and I both live in Atlanta, Georgia and commute daily to our employment. We are looking forward to XM radio's traffic and weather channel. We believe it will provide up to date information of the constant changes in traffic and weather which is not provided by the local stations except on the half hour - plus we drive on interstate 85 north of Atlanta and the local radio stations fade as we go North. Listening to other cities which have XM traffic and weather, it is more complete and up-to-date. Please do not prevent XM radio from providing this valuable service.

Mr. & Mrs. Jacobs
